

## A GOOD START IN THE NEW PVD-COATING CENTER OF SEGER CUTTINGS TOOLS WITH eifeler-TECHNOLOGY

SEGER Cutting Tools ([www.segerct.com](http://www.segerct.com)) was founded in 1998 in Wisniowa (Poland). The customer is a provider of cutting tools for the metal working industry. Their service portfolio includes the manufacturing of cutting tools and providing services such as pre and post treatment, PVD coatings and much more. The primary client base of SEGER are in the automotive, aviation and mechanical engineering sectors.

voestalpine eifeler Vacotec GmbH is very proud to announce that the customer's new coating facility is operating at full capacity. The PVD coating center of SEGER is equipped with an alpha400P with SPCS Technology, a Cleaning line, wet-blasting system and much more. Seger Cutting Tools is an innovative company with a first-class infrastructure and a team that is highly motivated to achieve success with their new in house coating center.

"This sale underpins our ambition to grow in Eastern Europe. voestalpine eifeler Vacotec GmbH is an experienced and highly reliable service, engineering, and application partner"

Dipl. Ing. Mourad El Barkani, Sales Manager Europe

"I am delighted that voestalpine eifeler Vacotec GmbH has completed the installation of a complete PVD Coating Center here at Seger Cutting Tools. Our company is focused on developing and investing in innovative technological solutions that enable us to have a direct impact on the quality, performance and delivery of our products and services. Eifeler PVD coatings guarantee the highest quality and performance levels for our cutting tools. eifeler is a trustworthy partner who showed great professionalism, timely delivery and highly competent technical training"

Marek Mikuszewski, CEO of Seger Cutting Tools
